REV 10/04

[p39] One skilled in the art will recognize that the described methods are equally applicable in a general packet radio service (GPRS) network. By informing the HLR of features not supported by a new serving GPRS support node (SGSN), the GLR implicitly indicates the features which are supported by the new SGSN, and vice versa. For a more detailed description of GPRS and SGSNs, the interested reader should refer to U.S. Patent Application No. <sup>09547991</sup>~~(Attorney Docket No. 040000-535)~~ "Gateway Location Registers In A UMTS System" which is herein expressly incorporated by reference.

[p40] The present invention has been described by way of exemplary embodiments to which the invention is not limited. Modifications and changes will occur to those skilled in the art without departing from the spirit and scope of the invention as defined in the appended claims.
